Today I was on Chicago's [Morning Answer](#) with [Amy Jacobson & John Anthony](#), talking about the former New York City COVID czar's drug-fueled sex parties during "lockdown." We also discussed the [Cuomo hearings](#) and the fact that the biggest mass casualty event in NYC history hasn't been verified with basic death records and could be [fraudulent](#).

The Dr. Jay Varma ***Confessional*** videos have generated the intended amount of outrage, as people are once again reminded that officials across America and throughout the world held one set of COVID rules for You & Me and another for themselves. It's the same essential story we saw with Boris Johnson, Neil Ferguson, Gavin Newsom, Lori Lightfoot, and [insert your own leader here] - none of whom feared a coronavirus, and behaved accordingly, even while pushing policies that harmed the populace and violated civil liberties many times over.

The alleged gatherings attended by Varma and his **pediatrician wife** certainly put public health hypocrisy & disregard for laws around illicit substances in full view and keep Operation COVID in the news cycles, which I appreciate.¹ Things Varma says about the purpose of **mandates**, vaccine **irrelevance**, the **role of teacher unions** in keeping schools closed, etc., are sobering and maddening examples of the lies we were told & sold.

In the bigger picture, I am hoping New Yorkers and members of city council who are demanding accountability (like **Vickie Paladino**) are angry enough about these admissions to question *everything* that happened in spring 2020. We still have an unsubstantiated Big Apple Death Spike that was used to justify illegal mass quarantines of healthy people,

forbid funerals & weddings, close businesses & houses of worship — **and** convince Americans and the world that a shot was needed.

I'm not sure if city council realizes the pathogen the COVID czar wasn't worried about is blamed for the deaths of more than 20,000 New Yorkers in a couple of months - including many **working-age adults** - but someone should let them know.²

Since The Dead can't be found in *The New York Times*, **FEMA trucks**, **funeral money**, or records showing exactly **how 27,000 extra bodies were moved**, maybe the first question Jay Varma can be asked at **a hearing** is, "Where are the bodies?"

1 - I say “alleged” because there’s a part of me that watches the videos and sees/hears a guy who is saying all kinds of things to an unidentified woman he is clearly hoping to score with. It’s not that I *disbelieve* him about the parties necessarily; it’s the sheer *braggadocio* in his manner, coupled with a claim I seriously doubt i.e., that he convinced an otherwise resistant mayor to put vax mandates in place. Then again, Varma is perhaps arrogant enough to actually believe that he did...

2 - The message that [young and healthy people were at risk](#) from “the coronavirus” was conveyed by the Federal government in guidelines [sent as postcards](#) to millions of Americans - and echoed by doctor voices from New York City in March/April 2020.
