

EARLY 2020/STAGED PANDEMIC (NON NYC/NON FLU)

Memory Lane: 14 January 2020

A brief, selective stroll down memory lane to reiterate that there was no pandemic. Only lies.

Five years ago today - the day after the WHO endorsed the Corman-Drosten PCR testing protocol - the agency said Chinese authorities "have found no clear evidence of human-to-human transmission of the novel coronavirus (2019-nCoV) identified in Wuhan, China."

World Health Organization (WHO)  
@WHO

Preliminary investigations conducted by the Chinese authorities have found no clear evidence of human-to-human transmission of the novel [#coronavirus](#) (2019-nCoV) identified in [#Wuhan](#), [#China](#) .

They were right. There was no evidence of any such thing - and never has been (including with [the 'first' transmission in the United States](#)).

At a press conference, WHO employee and pandemic-pusher [Maria Van Kerkhove](#) said,

"Epidemiological investigations are underway, and we are waiting for the results of these, but yes, it's certainly possible that there is limited human-to-human transmission."

and

"This is not unexpected. This is something that the global community is preparing for & all of the systems are in place to activate our plans, & to utilize the materials that we developed for SARS, for MERS & adapt them for the current situation."

What Maria really meant was ***We now have a test for this newly-named thing*** and ***We are very excited that we can finally activate the global pandemic simulation/live exercise.***

The following day, a legal permanent U.S. resident living in Snohomish County (WA)

who had been in Wuhan since Nov 2019, visiting family, arrived symptom-free at Seattle-Tacoma Airport.¹

Four days later, on 19 January 2020, the man went to an outpatient clinic with an unremarkable fever & a cough. Due to travel history, the state health department contacted the CDC, which said to test him for the "novel coronavirus." Snohomish Man's specimen were collected and shipped overnight to CDC in Atlanta, on a still-unidentified airplane, and found to be "positive".

He was admitted to the hospital for no good reason, developed pneumonia therein, treated in a highly-unethical manner, did not die, and was never heard from or "about" again. (See [thread](#) for the bizarre sequence of events.)

Also on January 19th, China said it had "confirmed" human-to-human transmission.

Oddly, when I posted Gottlieb's tweet a year ago, he deleted it an hour later...

But I digress.

All of this to emphasize, again, **there was no pandemic.**

Only lies.

And always remember, Scott Gottlieb tv salesman for Pfizer, once commissioner of the FDA, was there to advise all of us. And did I mention, Gottlieb was once the commissioner of the FDA. In the world of covid it feels like the snake oil salesman knows the snakes don't bite and hasn't a clue what is in the bottle. I might have forgotten to mention that Dr. Gottlieb was the commissioner of the FDA.
