

NYC 2020 (CHRONOLOGICAL)

YouTube Pulls Video of Me & Mark Kulacz Talking About New York City's Mass Casualty Event on Housatonic Live

Who needs government-directed censorship when the Tech Bros will do it anyway?

Happy First Friday of December 2023!

It's been almost a year since my Twitter restoration and I've now poked the YouTube bear.

Last night, the platform pulled a video of Mark Kulacz & me talking about New York City's mass casualty event, shortly after the live premiere.

As the name suggests, Mark's show *Housatonic Live* is usually live. We did a recorded conversation yesterday afternoon instead, and a premiere of a slightly-edited version at 8:15 p.m. (ET). We were both in the live chat, as was Jonathan Coeuy of [Gigaohm Biological](#).

Within 20 minutes of the premiere ending, YouTube removed the video for violating Terms of Service.

The Housatonic Live **channel** got a Community Guidelines strike for (allegedly) breaching YouTube's Medical Misinformation policy. That means Someone or The

Algorithm determined the conversation “poses a serious risk of egregious harm by spreading medical misinformation about currently administered vaccines that are approved and confirmed to be safe and effective by local health authors and by the World Health Organization (WHO).” 🙄

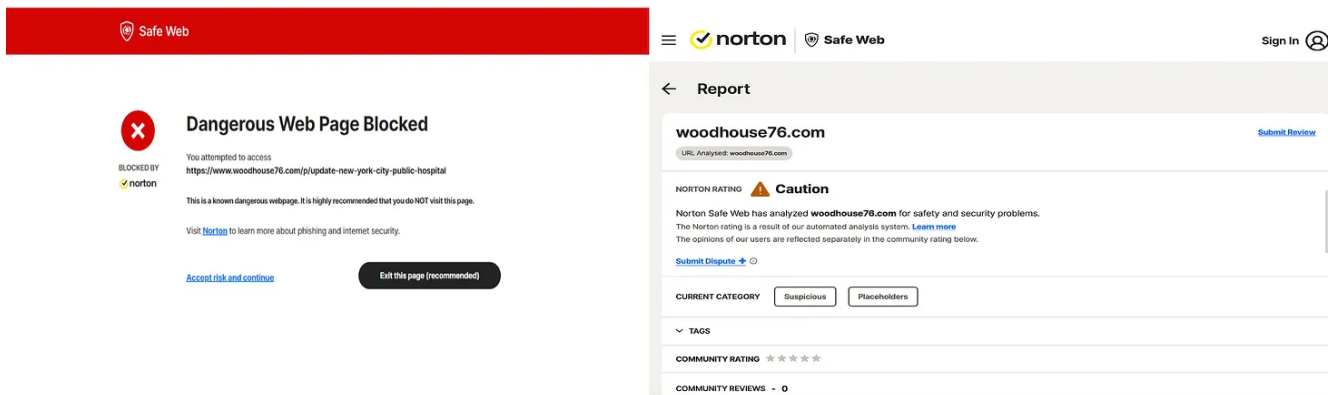

Mark and I didn't talk much about the COVID shot, as its not my focus.

We DID talk about the implausible, potentially fraudulent data surrounded NYC's spring 2020 event, connections to the opioid epidemic, alternative meanings of COVID-19 as a death coding, and the flu shot. (You can watch and listen for yourself on [BitChute](#), [Odysee](#), or [Rumble](#).)

As Wood House 76 readers know, I am no stranger to social media hand-slaps for COVID-19 posts. I started this Substack after Twitter locked my account in [July 2021](#). Later, I was “permanently suspended” - for 5+ months the second time around - which I [complained about](#) during the hiatus and chronicled [here](#), after the account was restored last Christmas.

[ICYMI, I recently changed my Twitter handle to [@Wood_House76](#), to mirror the name of this Substack. Unfortunately, the Muskian regime allowed a troll to quickly take the old handle. I advise ignoring or blocking that account — or at least not confusing it with The Actual [Me](#).]

Elsewhere on the Information Control Battlefield...Norton SafeWeb was blocking WoodHouse76.com as a Dangerous Web Page. I disputed the claim and have been “upgraded” to a Caution rating.

The screenshot displays the Norton SafeWeb interface. On the left, a red banner at the top reads "Safe Web". Below it, a red "X" icon indicates a "Dangerous Web Page Blocked". The text states: "You attempted to access https://www.woodhouse76.com/p/update-new-york-city-public-hospital. This is a known dangerous webpage. It is highly recommended that you do NOT visit this page. Visit [Norton](#) to learn more about phishing and internet security. [Account risk and continue](#) [Exit this page \(recommended\)](#)". On the right, a "Report" section for "woodhouse76.com" shows a "NORTON RATING" of "Caution" with a warning icon. Below this, it says: "Norton Safe Web has analyzed woodhouse76.com for safety and security problems. The Norton rating is a result of our automated analysis system. [Learn more](#). The opinions of our users are reflected separately in the community rating below. [Submit Dispute](#)". The "CURRENT CATEGORY" is "Suspicious" and "Placeholders". There are also "TAGS", a "COMMUNITY RATING" of four stars, and "COMMUNITY REVIEWS - 0".

Is it wrong that *Top Gun* fan in me prefers to be Dangerous? 🤔

Anyway, it seems the Tech Bros at Private Companies are still suppressing what the Government would want them to suppress — which why I'm not as celebratory as some people are about *Missouri v Biden*. In practice, the *principles* underlying free speech and free press remain suffocated.

Specific to COVID, the core story about sudden spread of a novel risk-additive coronavirus necessitating a global pandemic declaration and mass vaccination hasn't changed. Government and Social Media Magnates alike are protecting that narrative. Anything which challenges or disrupts it is still "Dangerous."

Evidently, that includes a casual data-focused conversation between **Mark Kulacz** & me.

UPDATE: New York City Public Hospital Agency Refuses to Release 2017-2019 Death Data

If there's nothing to hide, then why is NYC Health + Hospitals hiding data from the public AND themselves?
